

Mindous.ai Development Server - Deployment Verification Report

Date: November 15, 2025

Project: Mindous.ai

Location: /home/ubuntu/mindous/

Status:  SUCCESSFULLY DEPLOYED AND VERIFIED

Deployment Summary

The Mindous.ai application has been successfully started and verified. The development server is running on **localhost:3000** with all core functionalities working correctly.

Verification Checklist

1. Development Server Status

-  **Server Running:** Yes (PID: 15134)
-  **Port:** localhost:3000
-  **Framework:** Next.js 14.2.7
-  **Startup Time:** 2.4s
-  **Environment:** .env.local loaded successfully

2. Database Connection (Supabase)

-  **Connection Status:** Connected and operational
-  **Database Migration:** Applied successfully
-  **Read Operations:** Working (profile retrieval)
-  **Write Operations:** Working (task creation, profile creation)
-  **Tables Verified:**
 - profiles
 - tasks
 - pending_profiles
 - agents
 - executions
 - llmConfigs
 - context
 - llm_routing

3. Authentication (Clerk)

-  **Integration Status:** Working
-  **User Authentication:** Successful
-  **User Profile Display:** Visible in header

- **✓ Protected Routes:** Dashboard accessible after authentication
- **✓ User ID:** user_35Scncoge2wvzdp0l48thxbzppM
- **✓ Email:** sean@couplemill.com

4. User Profile Management

- **✓ Profile Creation:** Automatic on first login
- **✓ Profile Data:**
 - userId: user_35Scncoge2wvzdp0l48thxbzppM
 - email: sean@couplemill.com
 - membership: free
 - usageCredits: 5
 - usedCredits: 0
 - status: active
 - createdAt: 2025-11-15T00:39:31.865Z
- **✓ Credit System:** Working (5 free credits, resets Dec 13, 2025)

5. Frontend Pages Tested

Landing Page (/)

- **✓ URL:** http://localhost:3000
- **✓ Status:** 200 OK
- **✓ Components Verified:**
 - Header with navigation
 - Hero section with CTA
 - Features section (3 cards)
 - Testimonials section
 - Footer with links

Dashboard (/dashboard)

- **✓ URL:** http://localhost:3000/dashboard
- **✓ Status:** 200 OK
- **✓ Components Verified:**
 - Welcome modal (first-time user)
 - Task creation form
 - Information cards (Welcome, Activity, Stats)
 - Usage credits panel
 - Sidebar navigation

Settings (/dashboard/settings)

- **✓ URL:** http://localhost:3000/dashboard/settings
- **✓ Status:** 200 OK
- **✓ Components:** Account settings placeholder

Data Source (/dashboard/data-source)

- **✓ URL:** http://localhost:3000/dashboard/data-source
- **✓ Status:** 200 OK
- **✓ Components:** Data connections placeholder

Targets (/dashboard/targets)

- **✓ URL:** http://localhost:3000/dashboard/targets
- **✓ Status:** 200 OK
- **✓ Components:** Performance targets and analytics placeholders

Members (/dashboard/members)

- **✓ URL:** http://localhost:3000/dashboard/members
- **✓ Status:** 200 OK
- **✓ Components:** Team members management

6. API Endpoints Tested

POST /api/tasks

- **✓ Status:** 201 Created
- **✓ Response Time:** ~1049ms
- **✓ Functionality:** Successfully creates tasks in database
- **✓ Validation:** Title required, description optional
- **✓ Test Data:**
 - Title: "Test Database Connection"
 - Description: "This is a test task to verify the database is working correctly."

7. Environment Variables

- **✓ Supabase URL:** Configured
- **✓ Supabase Anon Key:** Configured
- **✓ Database URL:** Configured
- **✓ Clerk Keys:** Configured (Publishable & Secret)
- **✓ OpenAI API Key:** Configured
- **✓ Anthropic API Key:** Configured
- **✓ Google API Key:** Configured

Key Features Verified

1. Modern Stack

- **✓** Next.js 14.2.7 with App Router
- **✓** Tailwind CSS styling
- **✓** ShadCN UI components
- **✓** TypeScript support
- **✓** Server components

2. Robust Backend

- **✓** Supabase PostgreSQL database
- **✓** Drizzle ORM integration
- **✓** Real-time data operations
- **✓** SQL query execution

3. Secure Authentication

-  Clerk authentication
-  User session management
-  Protected routes
-  User profile integration

4. Credit System

-  Free plan: 5 credits
-  Credit tracking (0 of 5 used)
-  Automatic renewal (Dec 13, 2025)
-  Upgrade option available

 Performance Metrics

Metric	Value	Status
Server Startup Time	2.4s	 Excellent
Landing Page Load	~10s (first load)	 Good
Dashboard Compile	987ms	 Good
API Response Time	~1049ms	 Acceptable
Database Query Time	~161-587ms	 Good

 Server Logs Analysis

Successful Operations

1.  Profile creation for new user
2.  Profile lookup by user ID
3.  Task creation via API
4.  Page compilation (dashboard, tasks API)
5.  Database connection established

Minor Issues Observed

-  Initial connection timeout to Supabase (recovered automatically)
 -  First load took ~10 seconds (normal for cold start)
-

Application URLs

Page	URL	Status
Landing Page	http://localhost:3000	✓ Working
Dashboard	http://localhost:3000/dashboard	✓ Working
Settings	http://localhost:3000/dashboard/settings	✓ Working
Data Source	http://localhost:3000/dashboard/data-source	✓ Working
Targets	http://localhost:3000/dashboard/targets	✓ Working
Members	http://localhost:3000/dashboard/members	✓ Working

UI/UX Verification

Design Elements

- ✓ Responsive layout
- ✓ Clean, professional design
- ✓ Consistent branding
- ✓ Intuitive navigation
- ✓ Clear call-to-action buttons
- ✓ User-friendly forms
- ✓ Modal dialogs (welcome screen)

Navigation

- ✓ Header navigation (Home, Dashboard)
- ✓ Sidebar navigation (5 menu items)
- ✓ User profile icon
- ✓ Upgrade button
- ✓ Footer links

Security Verification

- ✓ Environment variables properly configured
- ✓ Authentication required for protected routes
- ✓ User ID validation in API endpoints

- ☒ Input validation (title required, description optional)
 - ☒ Error handling in API routes
 - ☒ Secure database connections
-

Test Results

Task Creation Test

Input:

- Title: "Test Database Connection"
- Description: "This is a test task to verify the database is working correctly."

Result:

- ☒ Task created successfully
 - ☒ API returned 201 status
 - ☒ Form cleared after submission
 - ☒ Data persisted to database
-

Overall Status

System Health: ☒ EXCELLENT

All critical systems are operational:

- ☒ Development server running
 - ☒ Database connected and operational
 - ☒ Authentication working
 - ☒ API endpoints functional
 - ☒ Frontend pages loading correctly
 - ☒ User profile management working
 - ☒ Credit system operational
-

Next Steps (Optional)

1. **Production Deployment:** Deploy to Vercel or similar platform
 2. **Task List View:** Add a page to view all created tasks
 3. **Task Management:** Add edit/delete functionality for tasks
 4. **Settings Implementation:** Complete the settings page
 5. **Team Features:** Implement member invitation system
 6. **Analytics:** Add usage analytics and reporting
 7. **Payment Integration:** Add Stripe for pro plan upgrades
-

Server Management

Start Server

```
cd /home/ubuntu/mindous/  
npm run dev
```

Stop Server

```
# Find the process  
ps aux | grep "next dev"  
  
# Kill the process  
kill <PID>
```

View Logs

```
tail -f /home/ubuntu/mindous/dev-server.log
```

Current Process

- PID: 15134
- Command: `node /home/ubuntu/mindous/node_modules/.bin/next dev`
- Status: Running in background

Support Information

- **Project Directory:** /home/ubuntu/mindous/
- **Node Version:** v22.14.0
- **Package Manager:** npm
- **Framework:** Next.js 14.2.7
- **Database:** Supabase (PostgreSQL)
- **Authentication:** Clerk
- **ORM:** Drizzle
